

# Printing Tips

- **Freeze page numbers** so they don't change later, even if rows are inserted, deleted, or reordered
- If your computer gives you the option to "**print backgrounds**" (or something similar), do it! It will preserve the shading of the rows, making the rundown easier to read
- You can **print landscape** by finding the page orientation option in your browser's page settings or printer dialog

Don't worry, these tips won't be printed
